

INDEX  
TO  
VOLUME XLIII  
(July 1 to Dec. 30, 1920)  
OF  
Automotive Industries

Every effort has been made to present in these pages a table of contents for six months' issues of AUTOMOTIVE INDUSTRIES that it may serve as a guide to the authoritative current and reference articles printed. This index will also serve as a reference for those who wish to use the news pages of this publication as a guide to the history of the material development of the industry. This work is in keeping with our efforts to make this publication entirely representative of the great industry.

***Look over this index and see how many items are of real interest to YOU!***

Every executive officer of an automotive manufacturing plant will find items of interest in the foregoing Index.

AUTOMOTIVE INDUSTRIES is the manufacturer's magazine. *Engineering, Production, Manufacturers' Merchandising, and Industrial Economics* are the four divisions of the industry covered by AUTOMOTIVE INDUSTRIES.

Foreign markets, domestic markets; the financial aspects of design, production and sale; labor conditions; news of the field and policies in general relating to the automotive field—all these, and other important subjects, are treated in a manner and with a thoroughness (particularly from the automotive manufacturer's viewpoint) not found elsewhere than in the pages of AUTOMOTIVE INDUSTRIES.

No matter what division of the industrial organization you are connected with—Engineering, Production, Distribution or Financing—AUTOMOTIVE INDUSTRIES has a weekly message for you that should not be overlooked.

Are you a personal subscriber—or is the office copy routed to your desk each week?

Look over this Index and note the number of items you should have seen *at the time they were published!*
